

Force of Love is the Force of Total Revolution, by Vimala Thakar

A tender, loving concern for all living creatures will need to arise and reign in our hearts if any of us is to survive. And our lives will be truly blessed only when the misery of one is genuinely felt to be the misery of all. The force of love is the force of total revolution. It is the unreleased force, unknown and unexplored as a dynamic for change.

We have moved very far away from love in our collective lives, dangerously near destruction, close to starvation. Perhaps we have the wisdom now, the awareness that love is as essential to human beings as the air we breathe, the water we drink, and the food we eat. Love is the beauty, the delicate mystery, the soul of life, the radiant unspoiled purity that brings spontaneous joy, songs of ecstasy, poems, paintings, dances, dramas to celebrate its indescribable, never-to-be-fully-captured bliss of being. Can we bring love into the marketplaces, into the homes, the schools, the places of business, and transform them completely? You may call it a utopian challenge, but it is the only one that will make a significant difference or that is fully worthy of the potential of whole human beings.

Compassion is a spontaneous movement of wholeness. It is not a studied decision to help the poor, to be kind to the unfortunate. Compassion has a tremendous momentum that naturally, choicelessly moves us to worthy action. It has the force of intelligence, creativity, and the strength of love. [...]

The vast intelligence that orders the cosmos is available to all. The beauty of life, the wonder of living, is that we share creativity, intelligence, and unlimited potential with the rest of the cosmos. If the universe is vast and mysterious, we are vast and mysterious. If it contains innumerable creative energies, we contain innumerable creative energies. If it has healing energies, we also have healing energies. To realize that we are not simply physical beings on a material planet, but that we are whole beings, each a miniature cosmos, each related to all of life in intimate, profound ways, should radically transform how we perceive ourselves, our environments, our social problems. Nothing can ever be isolated from wholeness.

There is much unexplored potential in each human being. We are not just flesh and bone or an amalgamation of conditionings. If this were so, our future on this planet would not be very bright. But there is infinitely more to life, and each passionate being who dares to explore beyond the fragmentary and superficial into the mystery of totality helps all humanity perceive what it is to be fully human. Revolution, total revolution, implies experimenting with the impossible. And when an individual takes a step in the direction of the new, the impossible, the whole human race travels

through that individual.
