I think in pictures. Words are like a second language to me. --Dr. Temple Grandin

### Thinking Outside the Human Mind

Dr. Temple Grandin is one of the most fascinating and respected figures in the world today. As a child whose parents almost sent her to a mental institution, Grandin became the first autistic individual to publish an autobiography. She has utterly transformed how we view people with autism and how we treat animals, specifically in the cattle industry. She explains to us what it is like for her to live in this world, having an autistic mind, and how it helps her relate to animals. "We need all kinds of minds" and beautiful things happen when we make an effort to see what others see.
