Kiss the Ground: The Soil Story
by Kiss the Ground

"Science meets inspiration in this tale of nature’s best hidden innovation: soil. The Soil Story is a five-minute film that shares the importance of healthy soil for a healthy planet. Learn how we can "sequester" (store) carbon from our atmosphere, where it is harmful, and pull it back into the earth, where it belongs, through regenerative agriculture, composting, and other land management practices. The film was directed in partnership with Louis Fox, best-known for the acclaimed viral series, The Story of Stuff."

For more inspiration, join an Awakin Call with one of the film’s creators, Ryland Engelhart, on Sacred Commerce, Love Activism, and the Solution of Soil. More details and RSVP info here.
